

- **GALLERY –**

The department conducts Anaesthesia post graduate academic programme once in two years which includes workshops, anaesthesia related quiz , cultural events and rich knowledge filled sessions.

Simulation of different case scenarios, with active participation from post graduates and staff members brings about working as a team concept, done regularly at our simulation lab at manipal.

Post graduates and delegates get hands on experience while attending these workshops and get to interact one on one basis with the concerned staff.

**Live demonstrations at the simulation center along with demonstration in cadaveric workshops.**

**Guest lecture session with live interactive session at the APGAP-CME conducted in manipal.**

**Team effort has always been to success to any of the workshop, CME , webinar conducted. We strive to give our best always.**
